

IFB Galaxy Day

December 4th 2013

« Galaxy and the metabolomic
analysis universe. »

Franck GIACOMONI, Pierre PERICARD, Gildas LE CORGUILLE, Misharl MONSOOR, Urszula CZERWINSKA, Marion LANDI, Christophe DUPERIER, Jean-François MARTIN, Sophie GOULITQUER, Estelle PUJOS-GUILLOT and Christophe CARON

CNRS UPMC
Station Biologique
Roscoff

A workflow for metabolomics

- ❖ Goals of the project :

- Builds a workflow and preconfigure workflows for metabolomic data analysis
- Target(s) : Chemists, Biologists, Scientists of metabolomic field with differents abilities level (beginner to expert)

- ❖ *Strengths : Galaxy a scientific web platform, knowledge*

- ❖ *Weaknesses : no implementation exists*

- ❖ *Opportunities : Collaboration / shared between 2 teams*

- ❖ *Threats : Is Galaxy the right tool? Is the community ready?*

Common practices involved in :

❖ *Environment :*

- Same VM with OS and Galaxy version
- Two Galaxy instances : Dev + Prod
- « Think workflow » as soon as possible
- Common tools integration rules

❖ *Integration steps*

- « **Tool Definition File** » template / mandatory parts (Help)
- Data set proposal in « Help » part or on « pages »
- Shared practices in dev steps

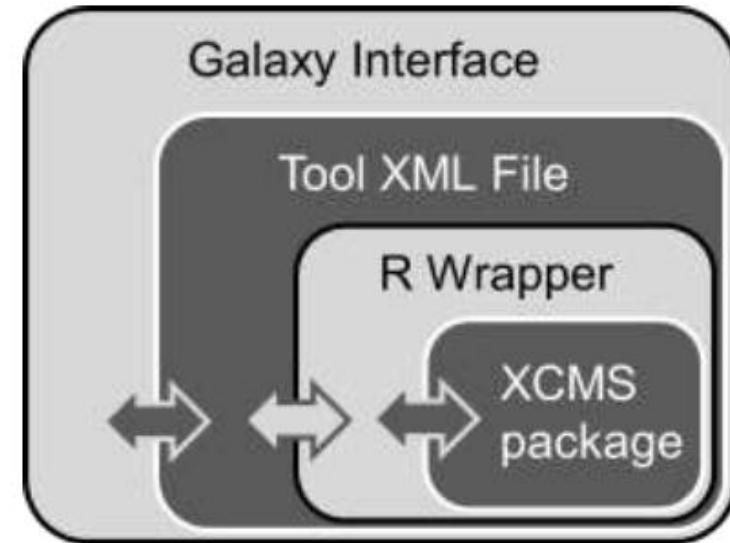

Common practices involved in :

❖ Quality level (before production):

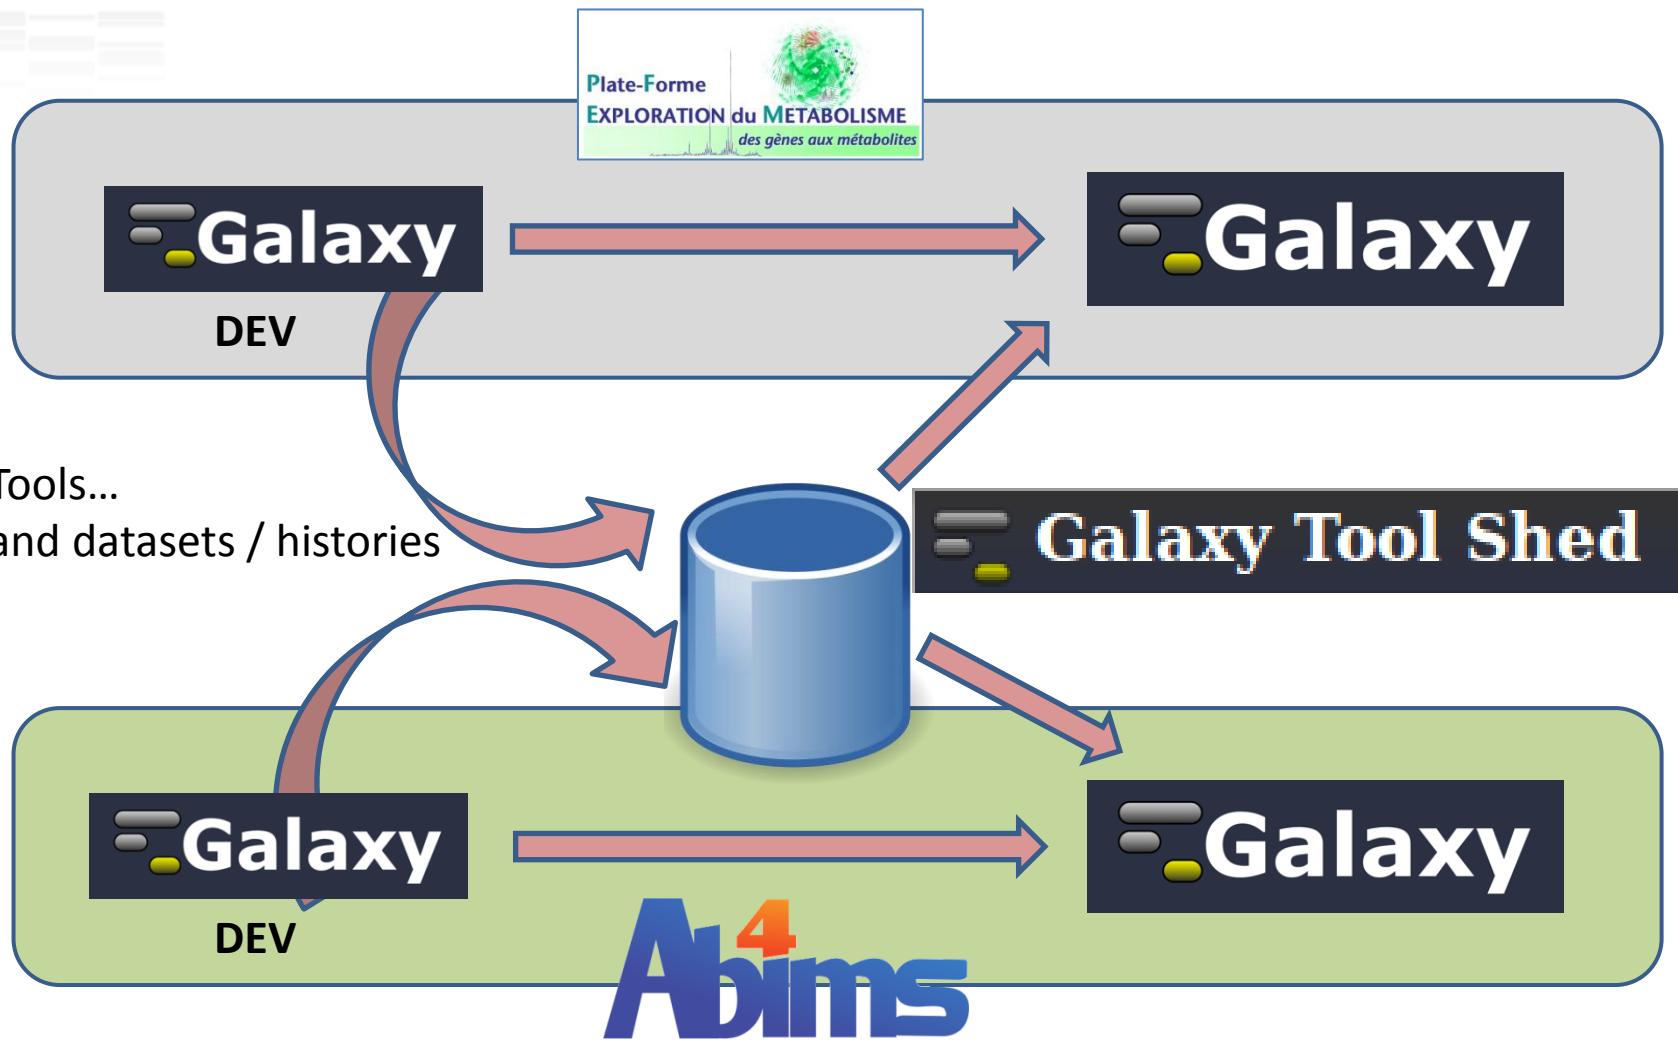

- Working tool (functional level)
 - Ergonomy of parameters and uses : tested by final user
 - Writting « HELP » based on common template
 - Citations
 - Name of authors
 - Workflow position (upstream / downstream tools)
 - Input file(s) / parameter(s) / output file(s) descriptions
 - (Working example)
 - Short user guide
- Publications in IFB GT Galaxy Wiki

Metabolomic Galaxy Experience

- ❖ R scripts wrapping
- ❖ JAVA wrapping
- ❖ Datatypes
 - Creation of RDATA
 - Adding « chemistry format »
- ❖ Own « Get Data »
 - Metabolomics produce huge datasets
 - « lib » mode to avoid massive upload

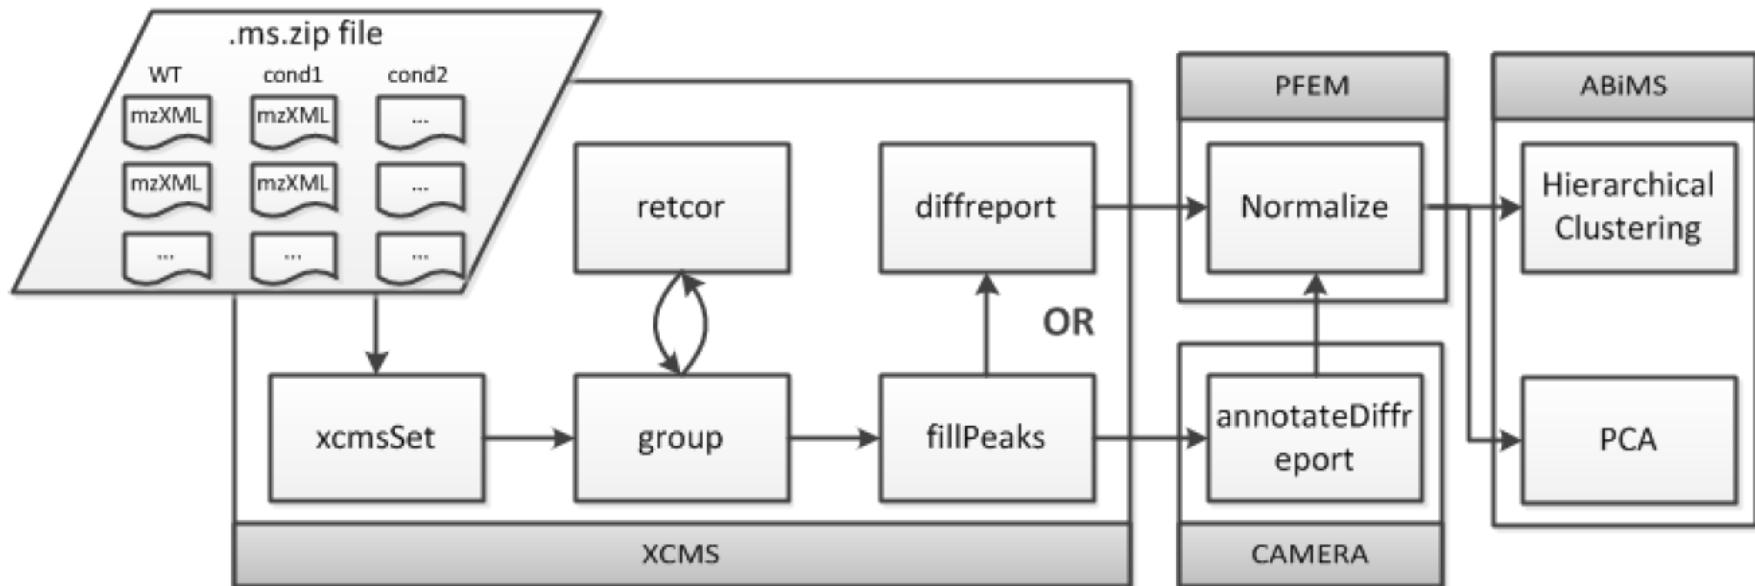

A common toolshed

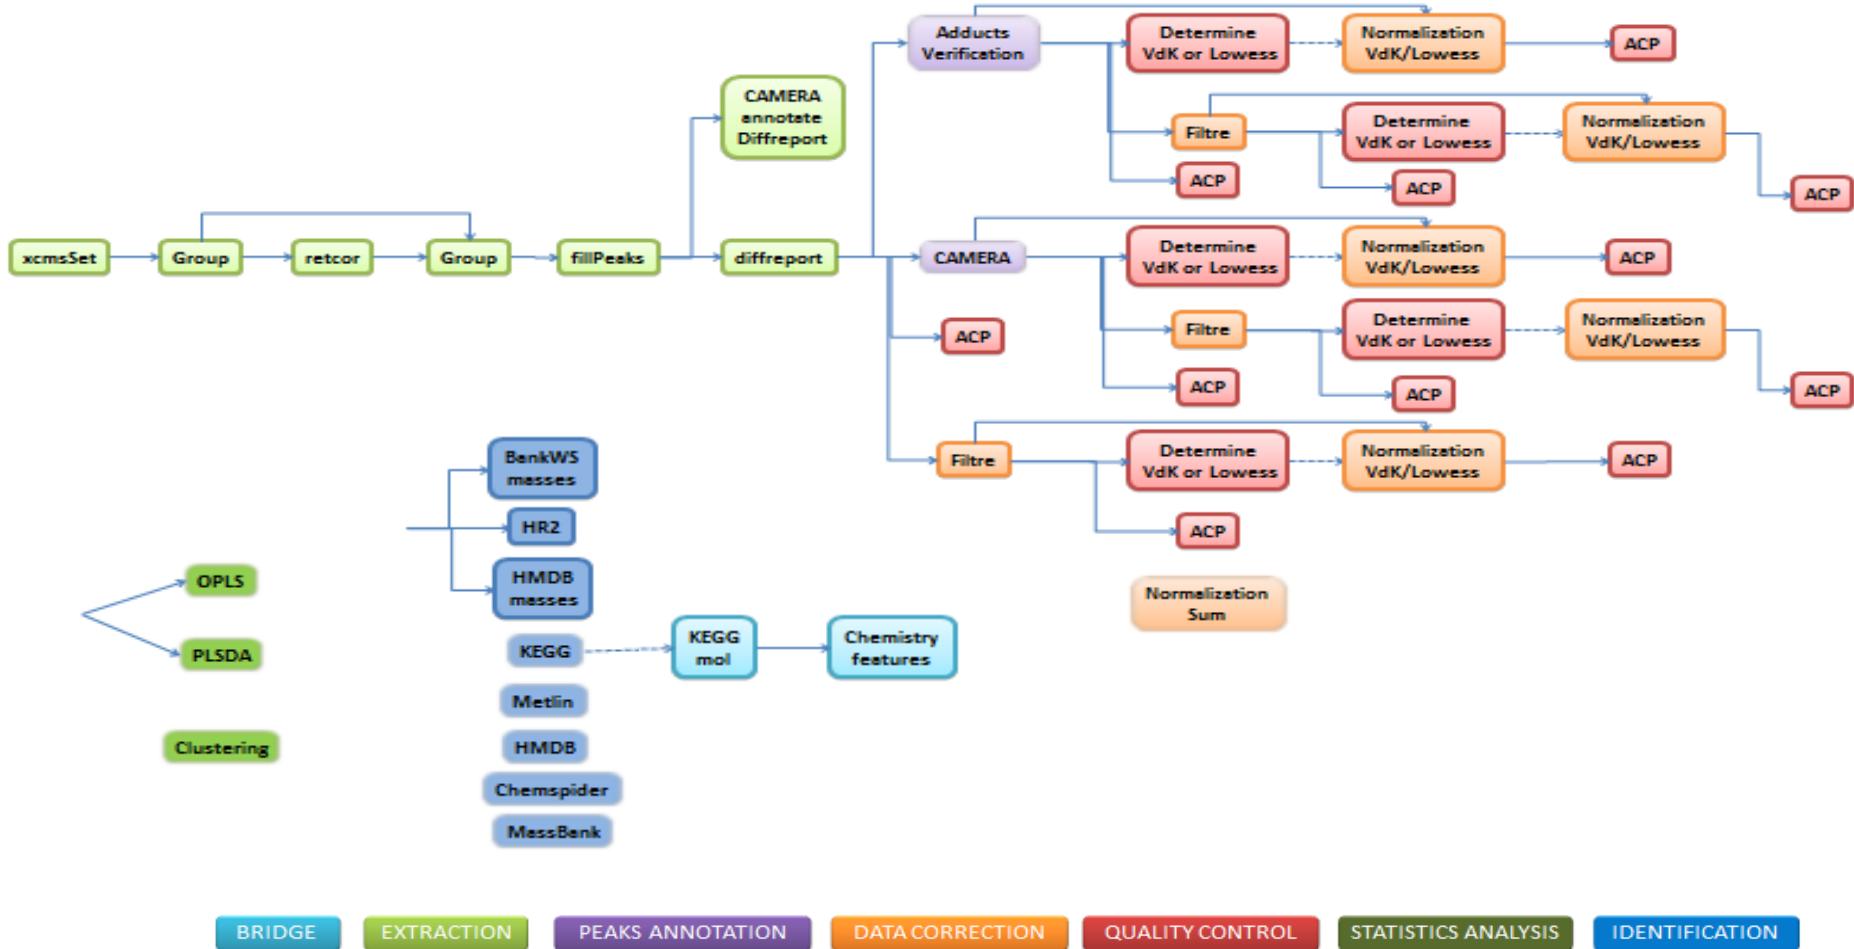

Workflow4Metabo : a team project

- ❖ Galaxy is a federative tool :
 - bottom-up approach for projects
- ❖ Initial collaboration / first workflow
 - PF CNRS ABiMS / PF INRA PFEM

Workflow4Metabo : a team project

- ❖ A few grants later :

Thank You!
